		User and society	Excellent
		Business and entrepreneurship	Excellent
		Math, data and computing	Not applicable
	Has met goals as described in PDP	Yes [In case of 'no', explain what is not developed and why.]	
Feedback	<p>The discussion was challenging because you showed a high level of expertise and skills. I believe you found the discussions maybe more difficult than one a B31 assessment should be, and you might actually be right. But that is the price when your level is already quite high...</p> <p>We believe we may have the same type of discussion with Cindy, with more fun possibly because out of an assessment context.</p> <p>I think we discussed aspects that is usually the challenge of a Master. You should keep working on them during your B32, and hope you can create a good base for a great Master as well.</p> <p>Congratulations!</p> <p>Result: P+E</p>
